Review: Creating new branches

This reading contains the code used in the instructional videos from **Creating new branches**

Introduction

This follow-along reading is organized to match the content in the video that follows. It contains the same code shown in the next video. These code blocks will provide you with the opportunity to see how the code is written and can be used as a reference as you work through the course.

You can follow along in the reading as the instructor discusses the code or review the code after watching the video.

```
cd checks/
git branch
```

Code output:

* master

```
git branch new-feature
git branch
```

Code output:

* master

New-feature

```
git checkout new-feature
```

Code output:

Switched to branch 'new-feature'

```
git checkout -b even-better-feature
```

Code output:

Switched to a new branch 'even-better-feature'

```
atom free_memory.py
```
