Review: Updating the local repository

This reading contains the code used in the instructional videos from **Updating the Local Repository**

Introduction

This follow-along reading is organized to match the content in the video that follows. It contains the same code shown in the next video. These code blocks will provide you with the opportunity to see how the code is written and can be used as a reference as you work through the course.

You can follow along in the reading as the instructor discusses the code or review the code after watching the video.

```
git pull
```

Code output:

remote: Enumerating objects: 8, done.

remote: Counting objects: 100% (8/8), done.

remote: Compressing objects: 100% (5/5), done.

Unpacking objects: 100% (6/6), done.

remote: Total 6 (delta 1), reused 6 (delta 1), pack-reused 0
